Thank you, Donna and Joe**

***Just completed a trip from Coast to Coast and
Border to Border and on the way again.***

This 1902 Sears-Roebuck Motor Buggy, originally purchased by Marcellus Diehl of York, Pa., has been owned and operated by his nephew, J. J. Ruth, 561 Smith St., York, Pa., for 30 years.

The motor has only been reconditioned once, it has worn out at least 6 sets of tires and been driven approximately 100,000 miles.

The opposed motor, a 4 cycle engine, located under the floor boards, has 2 cylinders with $4\frac{1}{8}$ " diameter pistons and 4" stroke. It has 2 suction intake and 2 exhaust valves. The gasoline in the cylinders is fired by 2 high-tension coils through 2 spark plugs run by 6 dry cells. The power from the motor is transmitted through 2 chain drives to the 2 36" wheels covered with solid rubber tires.

A friction clutch connects the motor with the drive wheels. The steering post is on the left side with a straight pipe for steering. The gas tank holds 5 gallons and at maximum speed of 30 miles per hour it is possible to get 15 miles per gallon of gas.

The Autocar Company built the motor and the Murray Carriage Company constructed the body.

The car has an 8 horse power motor and the original price was about \$500.00.
